

THE VALUES GAME

Ideal for use in team working sessions, these cards enable discussion on the values each member holds dear. By using and prioritising these cards, people will not only be able to express their own values to colleagues but also get to appreciate other people's perspectives. The Values Game is an invaluable aid to reaching consensus in groups, teams or organisations on the norms of behaviour that are considered to be important as well as highlighting those that are potentially damaging.

THE FEELINGS GAME

Feelings play an important role in our lives but many people have difficulty putting them into words. Designed to help people get over this difficulty, The Feelings Game will enable people to discuss the way they experience situations, people or organisations both positively and negatively. An indispensable resource whether working with teams or individuals, particularly when dealing with issues relating to change.

Ideal for Coaches, Trainers, Counsellors or Mentors, both packs consist of 140 10 x 6.5cm cards. Also included is a leaflet explaining the game and how the cards are grouped plus outlines for several methods of play.

Great value through our own website at only £35 each + p&p & VAT
